ROOM FOR LUXURY

A simple space gets bold upgrades for a more stylish, livable bath.

writer KRISTINA MCGUIRK
photographer MARTY BALDWIN
illustrator ANN WEISS

THE PROBLEMS

1. The vanity did not properly balance the oversize built-in tub on the opposite wall.
2. Separate rooms for the toilet and shower were wasting valuable space in the floor plan.
3. Heavy woods mixed with dismal wall color darkened the already lifeless palette.
4. The cavelike shower was dark and cramped—poor conditions for a place to start or end the day.

“I wanted to create two completely different looks, but with the primary focus of opening up the walls for a spacious feel.”

Jules Duffy
designer

DESIGNER

Jules Duffy's fresh perspective reinvents old spaces with bold style that you can live in. See more of the New Jersey-based designer's work at julesduffy.com.

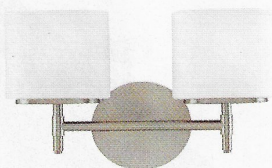

Choosing materials with similar color palettes allows the varying patterns of the window shade, wallpaper, and rug to coexist.

Pairing a sleek desk with a fun mirror fashions a makeup vanity that embraces the bath's clean lines. The pouf is a whimsical touch.

STYLISH DOUBLE VANITIES

Twice is nice when it comes to a busy shared space like a master bath. Check out BHG.com/DoubleVanity for spaces that benefit from twice the style, too.

Home Depot
homedepot.com

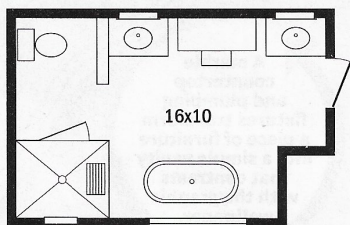

THE SOLUTIONS

1. Ditching the separate toilet and shower rooms allowed for an open floor plan that feels less constricted. A partial wall still provides privacy for the toilet.

2. Moving the shower to the tub wall created a more balanced bathing area opposite the vanities.

3. Earthy hues and nature-inspired design in the wheat-color shower walls, pebble tile shower floor, garden-theme wallpaper, and hemp cage light have a relaxing aura that lightens the space.

4. Two petite, separate vanities serve the same purpose as the previous two-sink unit but without crowding the room. Their small structure allows a makeup vanity to also fit into the space.

TOTAL

prices are estimates, excluding installation

\$16,339

“The sofa wall is meant to be inviting,” Duffy says. “It makes the space more of a lounge and less of a bathroom.”

A marble countertop and plumbing fixtures transform a piece of furniture into a simple vanity that contrasts with the graphic wallpaper.

THE SOLUTIONS

1. A loveseat replaces the unused tub. It's a dramatic change that doesn't alter the available space—but does create a more intimate setting.
2. Taking risks with new products, like the boldly patterned concrete flooring and dramatic wallpaper, pays off when the elements are paired with more traditional finishes, silhouettes, and fabrics. The result is a stylish and tailored high-end look.
3. Installing both rain-style and handheld fixtures upgrades the shower to a more spa-like experience.
4. Running the same flooring throughout the bath (including the shower) creates a visual consistency that, paired with the glass shower enclosure, makes the space appear larger. The design tricks the eye into seeing the shower as connected to the main area of the floor plan.
